

Telepractice via MyTherapyTracker

MyTherapyTracker

For Therapists - By Therapists

How to start a Telepractice session in MyTherapyTracker

1. Select the required client and ensure you are viewing the client's Personal Details tab
2. Click on the video icon to the left of the client's name

Personal Details	Background Info	Contacts	Targets
	Title	Mr.	
	Forename	Boris	
	Surname	Hamidja	

3. The **Telepractice Sessions** pop-up will appear

Click here to open a new browser window and start a new telepractice session straight away. The session will automatically begin, you just have to wait for your client to arrive.

The Meeting Name is unique to each client, and will always be the same. If you want to change it, however, click 'Set New Name'.

Telepractice sessions are more interactive in the app compared to in a web browser, and the app is required if using it on a mobile device. To download the app to your computer or mobile device, use these links.

This is the **Meeting Name**. If you have the app downloaded and installed, you can paste this ID into the app to start the video session from there. You can also send this Name to your client, if they have the app too.

Note: the app is required if using a mobile device for video sessions.

To copy the Meeting Name, click into the box. The Name will be highlighted automatically for you to copy.

This is the **Meeting link**. You and your client can use this link to access the Telepractice session via a web browser. You can send this link to your client in an email.

To copy the Meeting link, click into the box. The link will be highlighted automatically for you to copy.
